datto | RMM

Better Together:
The Intel vPro® Platform
and Datto RMM

Helping MSPs Keep Businesses Anywhere
More Secure and Productive

10%
FASTER

Datto RMM was "born in the cloud" and delivers consistent innovation. That's one reason why **Datto partners are growing nearly 10% faster than other MSPs.**[1]

7,680
SECURITY
SUPPORT HOURS

With Intel® Endpoint Management Assistant (Intel® EMA) hosted in the cloud, MSPs can remotely connect to Intel® Active Management Technology (Intel® AMT) and gain an estimated annual reduction of **7,680 security support hours, which is based on a composite organization from a report commissioned by Intel.**[2]

79%
OF MSPS
HIT BY RANSOMWARE

79% of MSPs report clients hit by ransomware.[3] Datto's RMM real-time performance monitoring alerts MSPs instantly about issues on any application, platform, or device.

832
HOURS SAVED

Automatic remote patch deployment through Intel AMT **saved 832 hours over 3 years as estimated using a composite organization, resulting in risk-adjusted cost savings of USD 81,000.**[2]

10x
GREATER

The cost of business downtime is 10x greater than the cost of the ransom requested.[3] Smart MSPs are deploying business-class PCs built on the Intel vPro® platform and raising the bar in PC security—while managing via Datto's single pane of glass console.

[2] "The Total Economic Impact" of the Intel vPro" platform," a study commissioned by Intel and conducted by Forrester Consulting (December 2018). Savings that other organizations will receive will vary based on a variety of factors, including size and baseline level of security, manageability, and productivity before the business switched to the Intel vPro" platform. Consult other sources and use information specific to your organization to determine benefits for your organization. Read the full study at intel.com/vProPlatformTEI. Your costs and results may vary.
